Fullstack Developer

Since graduating General Assembly's Bootcamp at the end of July 2022, I independently started learning new languages, libraries, and frameworks such as TypeScript, NextJS, TailwindCSS, React Query, Zustand, Jest, and React Testing Library. I've also joined the Hack for LA organization that focuses on civic minded open source projects for the city of LA and an advanced React bootcamp. I've also been taking a data structures and algorithms Udemy course and practicing algorithm problems everyday. I'm steadily improving my skills and I've been loving it!
